My Alphabet Blocks

Blocks to Decorate & Build From A to Z

Templates for unique toy boxes to print and decorate over and over again!

An adult should always work with a child when using a computer, printer or scissors!

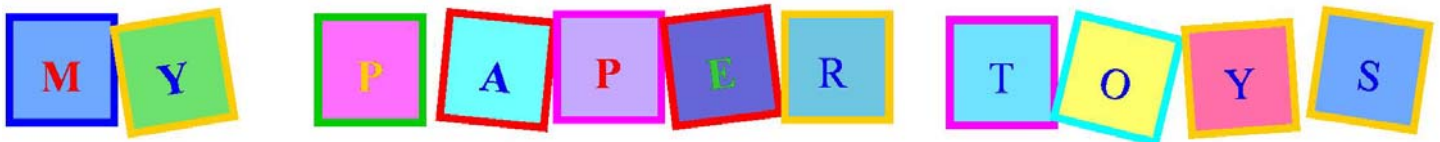

Challenge your child to find or draw pictures of things that begin with each letter and put them in the right box. They'll enjoy creating them and learning while they play. It's a special bonus to both *you and your child* to enjoy spending the time together while you help them build their Alphabet Boxes!

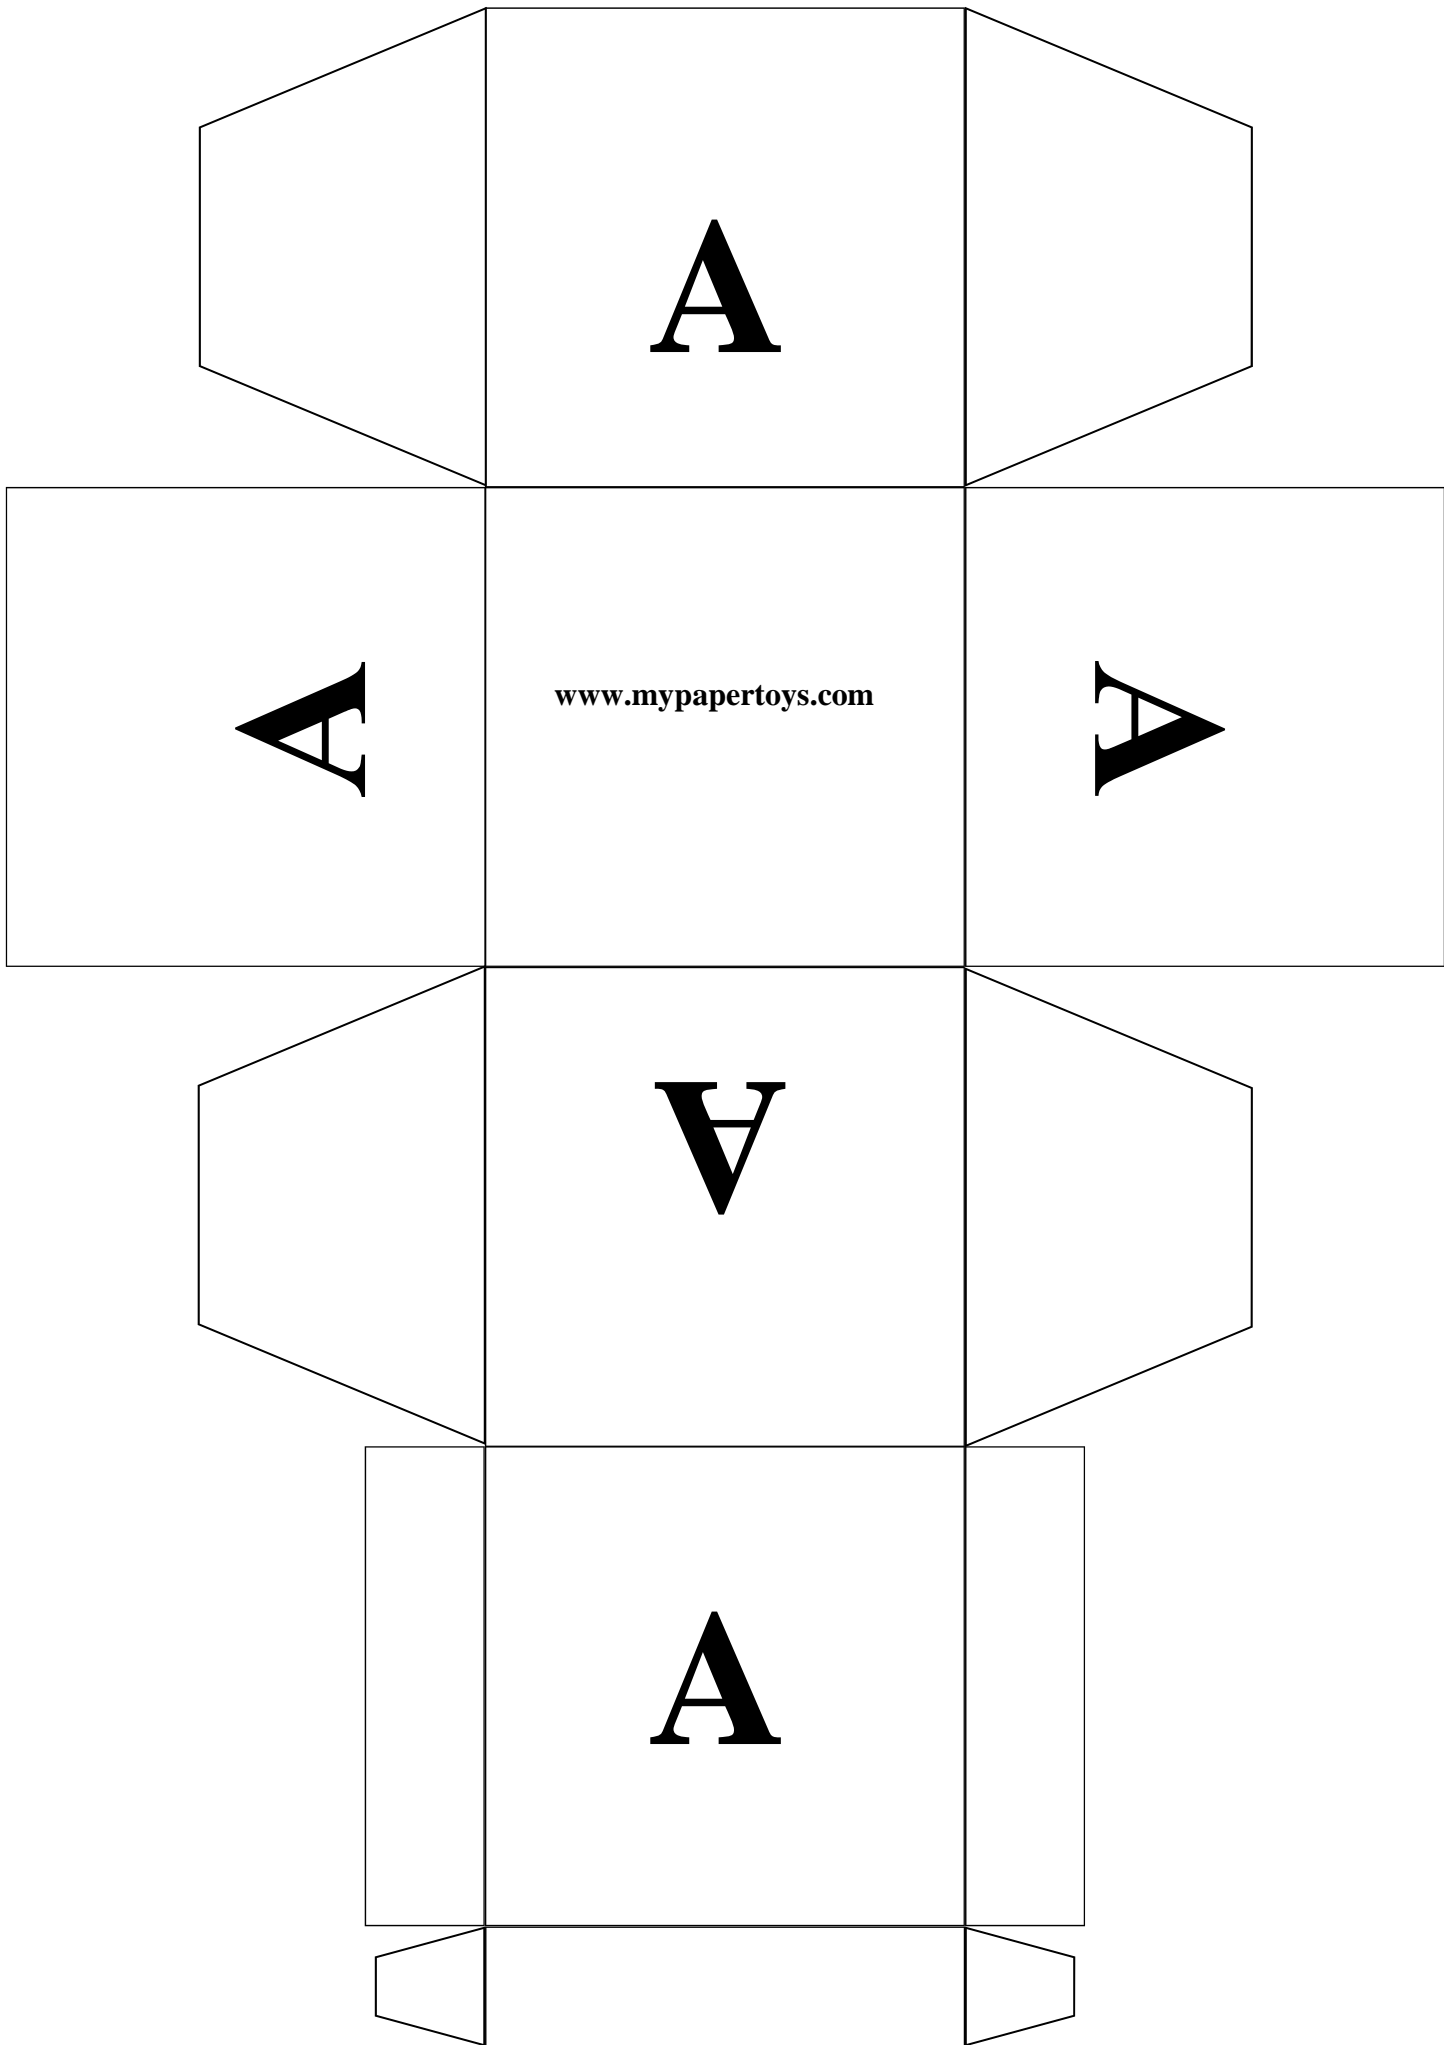

Directions:

- Print the boxes on colored paper or card stock for a variety of colors or plain paper if you'd like to decorate each box yourself.
- Print them all or just one at a time!
- Cut out each box on the outside guide lines.
- Fold on the inside lines and bend the flaps in toward the center.
- Secure the folds with tape or glue. Light weight double-stick tape works best!

You can print the boxes over and over again

and find a different way to enjoy them every time!
